

CASE STUDY # 105

Company / User: PriceSmart, San Diego, CA.

Many customers do not want their name and information published; our case studies honor their privacy while telling their story.

The Challenge:

PriceSmart is a rapidly growing retail chain that operates in the Caribbean and South America. Because they operate the AS400 across their large network they needed a flexible gateway product to transform the IPDS print stream into usable PostScript or PCL. PriceSmart also required the ability to enable session licensing in an "on demand" fashion at their disparate locations.

The Solution: IPDSXpress™

American Printware and PriceSmart started a contractual agreement to supply PriceSmart with the IPDSXpress solution in September of 2006 and continues this strong relationship to this day. As of May 20th 2015, we have supplied PriceSmart with close to 200 sessions across their market. Using bulk buying methods we are able to supply the print sessions on a "just in time" basis and are able to offer competitive pricing to keep their overall costs down. Our solution is the most widely used IPDS transform software in the world. Please contact us for more information regarding our IPDS gateway products: IPDSXpress, IPDSServe and IPDSServe/PDF.
