

Introducing RoutXpress 3.1

The most advanced print management software tool on the market today

Key Features:

- Tracks all print jobs, by user, by printer, by department, by time, and by cost
- Re-directs expensive print jobs to the most cost-effective printing device
- Extensive reports, by user, by department, by printer
- Provides job accounting, by print job, by user, by account

Key Benefits:

- Provides a way to manage your print environment
- Reduces the cost of printing/copying by thousands of dollars/month
- Supports environmental culture
- Triggers disciplined use of print resources by end-users
- Essential tool for MPS consultants

Re-route print jobs to more cost-effective devices!

Control color costs by tracking color prints by users, by printers, and by application!

We use RoutXpress to make end-users aware of the cost of printing.....and print costs went down 50% in the first year alone.

Edmund Sumner, Sumner Group, Inc.

RoutXpress is a valuable tool which tracks print jobs by device, by user, and by cost—efficiently and cost-effectively. We can use these data to control the cost of printing and to chargeback print costs.

Bill Trainor, State of Virginia

Designed for these markets:

- Government
- Healthcare
- Legal
